How to use these prompts

1. **Your scene:** copy the "Your scene" line into the **Your scene** box on the Idea screen.
2. **Details:** copy the "Details" line into the **Add more detail** box, or tap **Suggest 4 details** for fresh ideas.
3. **Style:** pick the style on the card: **Breakout**, **Framed**, **Open scene** or **Diorama**.
4. **3D pop-out:** pick the pop-out on the card. **Extreme** aims one part (claw, hoof, nose) straight at you. **Standard** keeps calm scenes calm.
5. **Shape:** pick **Wide**, **Tall** or **Square**. Wide subjects need Wide or the edges get cropped.
6. **Look:** pick any Look you like. Prompts never name a wood type or color, so they work with every Look.
7. **Concepts are free.** Pick your favorite of the four, make a preview, zoom in to check hands, paws and faces, then make the HD if you want extra detail.

Quick guide to the styles

Style	What you get	Best for
Breakout	The subject bursts out of a broken frame toward you.	Action: animals, vehicles, heroes
Framed	The scene sits inside a carved frame or cutaway block.	Portraits, plaques, ornaments
Open scene	No frame. The subject stands in front of deep scenery.	Landscapes, wildlife, calm scenes
Diorama	A miniature room set, like a dollhouse with the front open.	Shops, kitchens, workshops, saloons

Make it yours: swap the animal or breed, change the season, or add a customer's pet, truck or trade. Name the main subject first; the app treats it as the hero. Two people joined by "and" (a bride and groom) are treated as one hero. Leave names and dates out of the prompt, since AI scrambles text; add them to the base or a plaque afterward.

Planning to cut it out? Avoid thin things sticking out past the design, like fishing lines, ropes, reins or bowstrings. Every AI result is unique, so use **Change something** or **Try again** if the first preview isn't perfect.
